### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Huppert on April 26, 2005.

The application has been amended as follows:

#### **IN THE CLAIMS:**

Claim 4, Line 7, "gradually" has been deleted,

Claim 5, Line 7, "gradually" has been deleted,

Claim 6, Line 3, "in a gradual manner" has been deleted,

The above changes to the claims have been made in order to remove indefinite language.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be an unobvious improvement over U.S. Patent 6,694,732 to Tsubouchi. Tsubouchi discloses a master cylinder having a cylinder body (11) in a cylindrical form having one end closed and including a discharge passage and a supply passage for a brake fluid, the supply passage being communicated with a reservoir, a piston slidably disposed in the cylinder body, the piston and the cylinder body forming a pressure chamber therebetween for supplying a fluid pressure to the discharge passage, and a piston seal (23, 25)

Art Unit: 3745

provided in a circumferential groove formed in a sleeve (26), the piston seal having an inner circumferential surface thereof in slidable contact with the piston and being capable of disconnecting the supply passage and the pressure chamber, wherein the cylinder body includes a communication groove (38) which opens into the circumferential groove and extends from the circumferential groove toward the closed end of the cylinder body to thereby connect the circumferential groove and the discharge passage. The unobvious improvement includes the communication groove having a bottom surface radially outward beyond the bottom surface of the circumferential groove.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

U.S. Patents 4945729 and 6848257 each disclose a master cylinder having a communication groove.
